Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

patentdocket@oblon.com
oblonpat@oblon.com
jgardner@oblon.com

Office Action Summary	Application No.	Applicant(s)	
	10/511,099	SERA ET AL.	
	Examiner	Art Unit	
	Nathan M. Nutter	1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 10/577,496 (US 2007/0079825) Sera et al, newly cited. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending application claims a composition that may comprise a higher alpha olefin copolymer, a thermoplastic resin and an elastomeric resin blend produced into an article, as recited and claimed herein.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimizu et al (US 5,049,613), newly cited.

Note column 4 (lines 27-38) for the thermoplastic, the paragraph bridging column 4 to column 5 for the higher alpha olefin copolymer, and compositional limitations thereof, and column 5 (lines 45-55) for the molecular weight of the higher alpha olefin copolymer. Note column 7 (lines 28-39) for articles produced therefrom. As regards the MWD of "4.0 or less" there is no indication that the value would or could be higher than one.

Claims 1, 2 and 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Abe et al (US 5,218,048), newly cited.

Note column 3 (lines 20-35) for the higher alpha olefin homopolymers, the paragraph bridging column 3 to column 4 for the thermoplastic resin and column 10 (line 45) to column 11 (line 27) for the elastomer employed. Further, note column 3 (lines 56-62) for the molecular weight which would be expected to be within the range of claim 4. As regards the MWD of "4.0 or less" there is no indication that the value would or could be higher than one.

Claims 1 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hauenstein et al (US 6,013,217), newly cited.

Note column 3 (lines 45-65) for the homopolymer of the higher alpha olefin. The paragraph bridging column 3 to column 4 shows the use of a thermoplastic in conjunction thereto. At column 8 (lines 1-29) the reference shows the production of articles, including films.

Claim Rejections - 35 USC § 102/103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Abe et al (US 5,218,048), cited and for the reasons set out above.

The reference shows the resin blend, as pointed out above. The employment of a stereoregular homopolymer of 1-decene would be within the purview of the reference, absent reasoning as to why it would not be. The molecular weight range and molecular weight distribution would also be expected to be within the ranges recited. A skilled artisan would have a high level of expectation of success following the teachings of the reference to arrive at the instantly claimed invention. As such, the instant claims are deemed to be at least obvious, if not anticipated, by the teachings of the reference.

Claims 1 and 3-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Iwata et al (US 5,430,080), newly cited.

The reference to Iwata et al teaches the manufacture of a blend composition of a thermoplastic resin that, at the paragraph bridging column 6 to column 7 may include a homopolymer of 1-decene with another thermoplastic resin. Though the reference is not specific as to stereoregularity of the poly(1-decene), such would be within the purview of the reference, absent reasoning as to why it would not be. The molecular weight range and molecular weight distribution would also be expected to be within the ranges recited. Since the higher olefin polymer is identical to that recited herein, the melting point would be expected to embrace that of claim 5. The particular catalyst employed in the manufacture of the resin fails to provide any patentable weight to the claims since the claims are drawn to a composition. Process claims in a product-by-process situation

have been held not to be claim limitations. See SmithKline Beecham Corp. v. Apotex Corp., No. 04-1522 (Fed. Cir. February 24, 2006).

As such, the instant claims are deemed to be at least obvious, if not anticipated, by the teachings of the reference.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathan M. Nutter whose telephone number is 571-272-1076. The examiner can normally be reached on 9:30 a.m.-6:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James J. Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
